

KDF Capacitors

Last updated: July 2020

K.D.Fisher have been selling motor run, start, pulse grade and electrolytic capacitors since 1972.

We have a large range of popular brands in stock ready for immediate delivery or collection.

Please contact us today for all your capacitor requirements.

Motor Run Capacitors

Capacitors in self-healing metallised polypropylene film, in resin, with isolated plastic case and 6.3mm double quick connect terminals and leaded options available.

Available capacitance range 1uF to 100uF. Voltage ranges 400 / 450V AC.

Motor Start Capacitors

These are non-polarised aluminium electrolytic capacitors designed for intermittent AC duty.

Wide capacitance range available – 21uF to 900uF. Voltage ranges 110, 125, 165, 220, 250 and 330V AC.

P2 Motor Run Capacitors

Capacitors in self-healing metallised polypropylene film, in resin, with isolated metal case with safety link device and 6.3mm double quick connect terminals and metal stud.

Available capacitance range 2uF to 80uF. Voltage ranges 400 / 450V.

Pulse Grade Capacitors

Capacitors in self-healing metallised polypropylene film, in resin, with isolated plastic case.

Available capacitance range 6uF to 50uF. Voltage ranges 900 or 1200V DC.

Electrolytic Capacitors

A polarised capacitor which uses an electrolytic to achieve a larger capacitance than other capacitor types.

Please contact us for available ranges.
