

**A flammable gas transmitter  
for use with remotely mounted  
flammable gas sensors**

# Sensepoint XCD RFD

## Applications

- Compatible with high temperature sensors for use in and around Gas Turbine Enclosures and solvent based printing and coating drying ovens
- Compliant with the requirements of HSE guidance note PM84
- Transmitter can be mounted in easy to access area even if sensor is in a hard to access or restricted access area
- Sensor can be mounted up to 30 metres (100 feet) from transmitter
- Standard temperature catalytic and infrared sensortypes also available

## Reliable detection

- Compatible with Honeywell Analytics' proven catalytic bead flammable gas sensors
- High temperature gas sensors have thermally matched beads for highest accuracy and stability enabling low alarm levels
- Gas sensors use long life, poison resistant beads as standard, reducing ongoing cost of ownership

## Easy to Use

- Easy to read tri-colour backlit display with digits, bar graph and icons
- Fully configurable via non-intrusive magnetic switches
- Selectable sink or source 4-20mA output
- Auto-inhibit during maintenance prevents false alarms

## Cost Effective

- Sensepoint XCD common transmitter platform
- Reduces training costs
- Reduced spares and stock costs
- Non-intrusive, one-man operation reduces cost of maintenance
- Optional Sensepoint XCD plug-in sensor reduces maintenance time further

**Sensepoint XCD RFD (Remote Flammable Detector) has been specifically designed for use with remotely mounted flammable gas sensors. This configuration is ideal for applications where the sensor is required to be mounted remotely from the transmitter in areas where temperatures are well above ambient (up to 150°C/302°F), or that are difficult to access. The transmitter can be mounted at a suitable location away from this area where it is easy to access, view its display and interact with via the user interface.**

Sensepoint XCD RFD is suitable for use with several Honeywell Analytics' sensors; the Sensepoint XCD catalytic bead and infrared type plug-in sensors and the Sensepoint standard and high temperature sensors. These sensors can be mounted up to 30 metres (100 feet) away from the transmitter thereby accommodating even the most remote and inaccessible applications.

The gas range is user adjustable at the transmitter from 0-100%LEL down to 0-20%LEL. The 0-20%LEL range is particularly suited for use with the Sensepoint high temperature sensors that have thermally matched beads providing optimum accuracy and stability allowing alarm set points as low as 5%LEL.

The transmitter's tri-colour backlit LCD clearly indicates the unit's status at a glance, even from a distance. A steady green backlight indicates normal operation, flashing yellow indicates fault and flashing red indicates an alarm.

Outputs include 2 programmable alarm relays, 1 programmable fault relay as well as 4-20mA output (sink or source selectable).

The range, relay operation, alarm set points and electronic tag number of the detector can be adjusted using the transmitter's LCD and the non-intrusive magnetic switches. Outputs are automatically inhibited during adjustment thereby reducing the risk of false alarm at the control panel during maintenance.

# Sensepoint XCD RFD Overview

The Sensepoint XCD Remote Flammable Detector (RFD) can be used with Sensepoint XCD remote flammable sensors (Catalytic and IR), or with the Sensepoint range of flammable gas detectors. The sensors can be directly mounted to the M25 entry at the bottom of the transmitter, or remotely mounted to suitable junction boxes or duct mounting assemblies. Sensepoint flammable detectors are available in both standard and high temperature versions.

Sensepoint XCD RFD with Sensepoint high temperature flammable sensor

Sensepoint XCD RFD with Sensepoint standard temperature flammable sensor

Sensepoint XCD RFD with Sensepoint XCD RFD remote plug-in sensor and socket (with weather protection fitted)

Available Sensepoint XCD RFD remote plug-in sensors:

\*Contact Honeywell Analytics for availability

## Ready, Steady, Go!

Sensepoint XCD RFD uses three instantly recognisable 'traffic light' colours to indicate its status. The large tri-colour backlit LCD flashes red to indicate an alarm, flashes yellow to indicate a fault and is steady green to indicate normal operation. This allows anyone in the area to clearly see at a glance the status of any detector. This can be particularly useful to identify detector status if the detector is located in a difficult to access area or if a number of detectors are located in the same area.

# Installation

## Mechanical

The Sensepoint XCD RFD transmitter has an integral mounting plate consisting of four mounting holes on the transmitter body. The transmitter may be fixed directly to a surface mounting, or to a horizontal or vertical pipe/structure, 40.0-80.0mm (1.6 to 3.1 inches) in diameter/cross section. The pipe mounting bracket accessory (optional accessory) may be used for this purpose.

## Installation Options

Wall mounted

Horizontal pipe mounted  
(Using optional pipe mounting kit)

Vertical pipe mounted  
(Using optional pipe mounting kit)

Typical installation of Sensepoint XCD RFD with remote Sensepoint standard temp sensor

Typical installation of Sensepoint XCD RFD with remotely mounted Sensepoint High Temperature sensor

Typical installation of Sensepoint XCD RFD with remotely mounted Sensepoint XCD plug-in sensor

Optional sunshade/deluge protection

# Installation

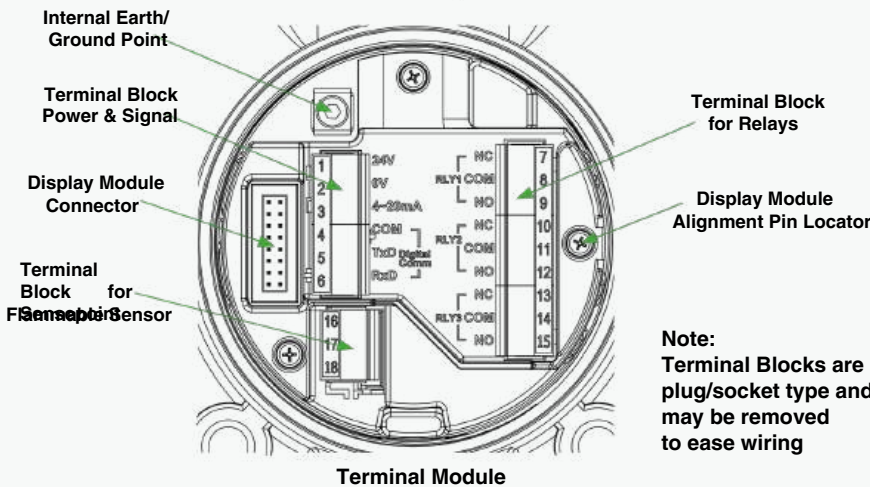

## Electrical

Sensepoint XCD RFD is designed for use in potentially explosive atmospheres. As such, installation should follow national guidelines using suitable mechanically protected cable and glands (M20 and M25). Use 0.5mm<sup>2</sup> to 2.5mm<sup>2</sup> cross sectional area cable as needed to ensure minimum operating voltage at the detector, depending on installed cable length.

Terminal Module Connections				
Terminal Number	Marking	Connection	Description	
1	24V	+VE Supply (18 - 32VDC)	Controller Connections	
2	0V	-VE Supply (0VDC)		
3	4-20mA	Current Output Signal		
4	COM	Drain		
5	TxD	MODBUS B (+)		MODBUS RTU. RS485 (Optional/ Pending)
6	RxD	MODBUS A (-)		
7	RLY1/NC	Normally Closed	Programmable Relay 1 (Default A1)	
8	RLY1/COM	Common		
9	RLY1/NO	Normally Open		
10	RLY2/NC	Normally Closed	Programmable Relay 2 (Default A2)	
11	RLY2/COM	Common		
12	RLY2/NO	Normally Open		
13	RLY3/NC	Normally Closed	Programmable Relay 3 (Default Fault)	
14	RLY3/COM	Common		
15	RLY3/NO	Normally Open		
16	+VE	Sensitive (Sensor Brown Wire)	RFD Sensor Connections	
17	-VE	Non-Sensitive (Sensor Blue Wire)		
18	01	Signal (Sensor White Wire)		
Earth Point	Earth Symbol	Earth Wire (Green- Sensepoint High Temperature version only)		

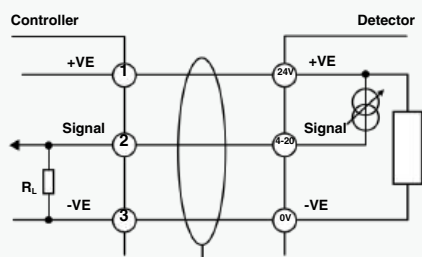

Puck Rear View

## Wiring Schematics

The Sensepoint XCD RFD transmitter may be wired in either current source or current sink configuration. These two options are offered to allow greater flexibility in the type of control system that it can be used with. Source/sink is selectable via the switch located on the back side of the display module; accessible by removing the display module during installation/ commissioning.

**Note:** Terminate cable screen at the detector or the controller, not both.

# Installation and Technical Summary

## Typical Cable Lengths

Typical Cable Data			Maximum Cable Length			
Cable Size (Cross Sectional Area)	Cable Resistance		Catalytic		IR	
	$\Omega/\text{km}$	$\Omega/\text{mi}$	Metres	Feet	Metres	Feet
0.5mm <sup>2</sup> (20AWG*)	36.8	59.2	356	1167	420	1379
1.0mm <sup>2</sup> (17AWG*)	19.5	31.4	671	2201	793	2599
1.5mm <sup>2</sup> (16AWG*)	12.7	20.4	1031	3387	1217	4000
2.0mm <sup>2</sup> (14AWG*)	10.1	16.3	1296	4239	1531	5006
2.5mm <sup>2</sup> (13AWG*)	8	12.9	1636	5356	1932	6326

### Note:

Table given for guidance only. Users should calculate maximum distances using actual data for cable being used. Typical calculation assumes minimum guaranteed controller supply of 24VDC, minimum detector voltage of 18VDC and maximum power supply under full alarm.  $R_L$  (max) is 250ohms.

## Sensepoint XCD RFD Transmitter

**Use** 3 wire 4-20mA gas transmitter for use with remotely mounted flammable gas detectors to protect plant and personnel from flammable gas hazards. Transmitter incorporates in-built alarm and fault relays, local tri-colour LCD display and is fully configurable via non-intrusive magnetic switch interface.

### Electrical

Input Voltage Range	18 to 32VDC (24VDC nominal)
Max Power Consumption	5 Watts
Current Output	Sink or source
$\geq 0.0 < 1.0\text{mA}$	Fault
2.0mA or 4.0mA	Inhibit (during configuration/user settings)
4.0mA to 20.0mA	Normal gas measurement
22.0mA	Maximum over range
Terminals	18 x screw terminals suitable for wire diameter 0.5mm <sup>2</sup> to 2.5mm <sup>2</sup> (20AWG to 14AWG)
Relays	3 x 5A@250VAC. Selectable normally open or normally closed (switch) and energised/de-energised (programmable) Alarm relays default normally open/de-energised. Fault relay default normally open/energised

### Construction

<b>Material</b>	Transmitter Housing Sensor	Epoxy painted aluminium alloy LM25 or 316 stainless steel Sensepoint XCD plug-in sensor and Sensepoint High Temperature sensor: 316 stainless steel. Sensepoint Standard Sensor: PPS
<b>Weight (approx)</b>	Weather Protection Aluminium Alloy LM25 316 Stainless Steel	Plastic 2.0kg (4.4lbs) 5.0kg (11lbs)
<b>Mounting</b>	Integral mounting plate with 4 x mounting holes suitable for M8 bolts Optional pipe mounting kit for horizontal or vertical pipe $\varnothing 1.5$ to 3" (2" nominal)	
<b>Entries</b>	European ATEX/IECEx versions: 2 x M20 side entries and 1 x M25 bottom entry. Suitable blanking plug supplied for use if only 1 side entry used. Seal to maintain IP rating	

## Detectable Gases and Sensepoint XCD RFD Sensor Performance

Gas	Selectable Full Scale Range	Default Range	Steps	Selectable Cal Gas Range	Default Cal Point	Response Time (T60) Secs	Response Time (T90) Secs	Accuracy	Operating Temperature		Default Alarm Points

### NOTES:

Performance data is: 1. Taken at nominal 20°C, 50%RH. 2. Applicable over the range 10 to 90% full scale. 3. Measured on units calibrated at 50% full scale. 4. Accuracy at 10% of default full scale (typical A1 alarm) of applied gas, or minimum (whichever is greater). 5. Measured at 500ml/min for IR and 1 Ltr/min for Catalytic bead using the calibration cup. Contact Honeywell Analytics for any additional data or details. For more details on the Sensepoint Standard and High Temperature sensors refer to Datasheet DSD1069.

# Technical Summary cont. and Ordering Information

Environmental	
<b>IP Rating</b>	IP66 in accordance with EN60529:1992
<b>Transmitter Certified Operating Range</b>	-40°C to +65°C (-40°F to +149°F) Note: The detector display may become illegible at temperatures below -20°C, but the detector continues its gas monitoring function. The display is not damaged and recovers when the temperature rises back above -20°C.
<b>Operating Humidity</b>	Continuous 20-90%RH (non-condensing), Intermittent 0-99%RH (non-condensing)
<b>Operating Pressure</b>	90-110kPa
<b>Storage Conditions</b>	-25°C to +65°C (-13°F to 131°F)
Transmitter Ordering Information	
<b>Standard Supply</b>	Sensepoint XCD RFD is supplied complete with integral wall mounting plate, 2 x M20 side entries and 1 x M25 bottom entry. 1 x M20 plug, Allen key for locking screw, operating magnet, quick start guide and instruction manual CD. Default settings, ranges and calibrations are 100% tested at the factory. Each unit is supplied with a test certificate.
<b>Shipping Details</b>	Shipping carton dimensions: L312mm (12.3") x W223mm (8.8") x D110mm (4.3") Approximate weight: aluminium 2.5kg (5.5lbs), stainless steel 5.5kg (12.1lbs)
